DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 recites physical properties of a Gurley bending resistance. The claims set forth the physical characteristics desired of the composite alone rather than the specific composition of the composite in the end product. *Ex parte Slob*, 157 USPQ 172, states the following regarding an article claimed by defining property values:

“Claims merely setting forth physical characteristics desired in an article, and not setting forth specific compositions which would meet such characteristics, are invalid as vague, indefinite, and functional since they cover any conceivable combination of ingredients either presently existing or which might be discovered in future and which would impart desired characteristics; thus, an expression a liquefiable substance have a liquefaction temperature from about 40 degrees Centigrade to about 300 degrees C and being compatible with the ingredients in the powdered composition, is too broad an indefinite since it purports to cover everything which will perform the desired functions regardless of its composition, and, in effect, recites compounds by what it is desired that

they do than what they are; the expression also is too broad since it appears to read upon materials that could not possibly be used to accomplish purposes intended.”

Thus, claims 1-21 are indefinite for reciting only the desired physical properties of the stated article, rather than setting forth structural and/or chemical characteristics of the article.

(It should be noted that 35 USC 101 sets forth “Whoever invents or discovers any new and useful...composition of matter...may obtain a patent therefor...title, i.e. does not include composition that have yet to be invented and discovered.).
